SEO optimizations for quizzes

Posted by Giorgos93 - 2021/10/25 18:46

_____

Hi, I use your plugin for a long time. But just now I thought about itâ€™s SEO optimizations. So I have couple questions:

1 - When I insert a quiz in a post by using shortcode, then do search bots see this shortcode as a full quiz with images, text, buttons and images, right? They see everything fully?

2 - I donâ€™t display quizzes, when someone enters the page. I show them, only if someone presses â€˜Start quizâ€™ button. the same question here: if the content at first is â€˜hiddenâ€™ under the button, then do search bots see everything fully, when they visit my pages with quizzes?

_____

Hello,

Quiz HTML content is generated only after "Start quiz" button click so search engines bots will not see it (but it depends on particular search engine bot behaviour).

If "Start quiz immediately" option is enabled in quiz settings then quiz HTML content will be available for search engines.

Regards,
ARI Soft
