'CONTINUE' button exists only on preview pages. Not on the 'real' ones (where I place the shortcut).

What to do? Thanks! https://www.ari-soft.com/images/fbfiles/images/QUIZ___2021_12_11_14_04_16.png

P.S. But I see it is OK in a test post:
Except one bug: After the last / second test question, the Correct/Wrong panel is not displayed.
