
Install pro version in wordpress

Posted by familyfaithrealestate - 2022/04/09 18:12

I had the free version of ari stream quiz in Wordpress and needed it to do a few more functions. I upgraded to the pro version and now I can't get it to recognize that I purchased the pro version. Im sure it is just something I am doing wrong, but at this pint I just give up! I see my api key with ari stream quiz, but I can't find where it goes or how to update within Wordpress the new version. I have uninstalled and reinstalled thinking that would help. it just went back to the free version.

Hello,

Upgrade free to PRO version is described here. Installation of the plugin is here. API key is entered in "API key" field on "ARI Stream Quiz -> Settings -> General" page.

You can check version of the installed plugin. Latest PRO version is 1.7.4.

If you need more assistance let us know.

Regards,
ARI Soft
