Hello,

Currently it is possible when the plugin is integrated with MailerLite via Zapier. We will have this feature for native MailerLite integration in our TODO list.

Hi there,

before I buy the plan, could you please explain if MailerLite can now be used to collect leads or not?
I'm afraid I actually don't understand the meaning of "only via Zapier" as I don't have any idea what zapier does, and your advertisement doesn't refer to this conditions with zapier either (screenshot).
Thanks! https://www.ari-

Hello,

Thank you for your interest in our product. The plugin supports integration with MailerLite. It will collect user name/email. Integration via Zapier with MailerLite can be used if need to send some custom tags/results (not only name/email).

ARI Soft
