
Enhancement Request 01

Posted by pravinl.patel - 2022/12/25 14:45

Cursor Focus:

Many time I write a question to Answer the text box and cursor focus help to avoid mismatch.

<https://ibb.co/b1SGvXR>

Answer Validation - Validate every question to have at least one answer

This will help to not miss an answer to a question.

Add Question Button - Add button to add a new question beside Add answer button.

If I have 10 questions then I have to scroll back to the top to add a new question. This feature request help to avoid scrolling.

Hello,

Thank you for your suggestions. We will implement them into future versions of the plugin (try to add #1 and #3 to the next version).

Regards,
ARI Soft
