---

Hello,

I just bought your ari stream quiz pro plugin, unfortunately I have a display problem when I want to put a quiz on an article. The answer is not displayed, see example attached.

Wordpress: 5.3.14 - PHP: 7.3

Can you help me fix this bug? [https://www.ari-soft.com/images/fbfiles/images/answer\\_display.png](https://www.ari-soft.com/images/fbfiles/images/answer_display.png)

Hello,

Open "ARI Stream Quiz -> Settings -> Advanced" and enable "Wrap templates in tags" option. If you use a WordPress cache plugin then also clean cache.

Regards,  
ARI Soft

Hello,

Thank you everything is working perfectly now.
