
Email Image Size in Results

Posted by apartridge2 - 2023/01/23 20:43

I have an issue with the image size on my Personality Quiz Result email.
I use the {\$image} tag given by the plugin, but it displays HUGE on my Gmail.
I have tried to tweak the code in every which way, but it does not fix it. Does anyone know how to make that image smaller?

Hello,

Could you re-send mail with results to this email?

Regards,
ARI Soft
