changing colors
Posted by drprofesq - 2023/01/26 19:14
_____

I've been able to find some css pieces here on the forum for changing the colors of the answers and quiz title, for example, but havent come across any for changing the questions themselves, the quiz subtitle, and the description. My background theme is black, so changing the body text to white works for all the above but messes up several pieces in the final sign-up box, as well as the result template text. If I change my body text to black, the result pieces are fine but the quiz sub-title (I've found css for the title itself), the description, and the questions themselves are blacked out (black on black).
Another solution would be to specifically change the sign-up box and results template text to black, but I haven't been able to find the css elements for those either.
Here is a link to the quiz on my website: shaggypalms.com/shaggy-quiz

Thank you!

Hello,

Could you provide image(s) to illustrate what you want to achieve? You can send them by email.

Regards,
ARI Soft

_____

What is the css code to change the top answer? I found how to change the button, but I'd like to change the top answer background color to something different. and the rollovers for that. Thank you!

_____

Hello,

Add the following custom CSS rules to "ARI Steam Quiz -> Settings -> Advanced -> Custom CSS styles" parameter:

body .asq-theme .quiz-question-answer {
 background-color: blue;
}

body .asq-theme .quiz-question-answer:hover {
 background-color: green;
}

Regards,
ARI Soft
