
Changing button background colors

Posted by esp2013 - 2023/01/28 20:13

Just started making my first quiz and want to change the default colour for the start quiz button. In Settings>Advanced>Custom CSS styles I added `.button-start-quiz {background-color: #01395E;}` but that did nothing. How can I reach that element to change the color? Is there anywhere else to choose button colours that I've missed?

Nevermind, I sorted it out. It's `button.button.button.salmon.button-start-quiz.full-width {background:#013995E;}`

Here's the CSS that works for me - thanks to chatgpt lol

```
button.button-start-quiz.full-width {
  background: #003366 !important;
  color: white !important;
  /* Additional styling properties */
  /* ... */
}
```

I have tried both the options mentioned in this thread and neither are working. Any other suggestions?

Could you provide a link to a page where you want to change button color?

This is one of them
<https://soulexpressionalchemistry.com/the-elemental-business-quiz-2/>

There's no CSS for the button set up at the moment, I removed it all so it didn't get confused.

Use the following CSS rule:

```
body .asq-theme .button.button-start-quiz {  
  background-color: green;  
}
```
