
How to change words on Buttons and results page?

Posted by esp2013 - 2023/02/01 23:12

Is there somewhere that I can change the words on buttons? I've made my quiz and done all the setup, it works well. I now cloned it and am translating it to Spanish for a bi-language website. How do I change the words on the buttons and the results page? If there is a template I can edit then I would just put both languages in.

Hello,

You can read here how to create a new translation or modify existing one. It is applicable for buttons/admin interface. Result templates can be in one language.

I used the ari-stream-quiz.pot in the overrides folder to make my edits and then translated the .pot file to .po and .mo in Poedit without any errors or corrections needed. I then uploaded these two files to the overrides folder in the Languages folder and refreshed my page but do not see any of my changes.

Attached folder view...

What am I missing here? https://www.ari-soft.com/images/fbfiles/images/ari_overrides_folder.jpg

Does the problem still exit? If yes, could you send translation file by email and specify what language is active on your site?

I managed to sort all this out on my own by editing the page defaults in the quiz-results folder.
