
Several Questions according to Personality Quiz

Posted by UChr - 2023/02/03 15:12

Hello,

I have developed a personality analysis using your PRO plugin.

You can see it here: https://tangram-consulting.de/persoenlichkeitsanalyse_test/

I have a few questions according to this:

Question 1:

The description says it is possible to display custom content at the end of the quiz, based on the number of questions answered correctly.

This probably applies more to trivia quizzes, but I am interested in the personality quiz as well. If it is possible, where can I set these IF-THEN functions? So far I've only found the option to display one of the 4 personalities as a blanket answer, and I've only found a few shortcodes that don't allow me to generate much individual text in the answers.

Are there more ways to add individualization to the text, or even charts?

For example, it would be exciting to see what percentage I have of the main expression and what percentage my second highest expression has.

Question 2:

Is it possible to send a mail not only to the user but also to my email? If so, where can I set this up?

Question 3:

Is it possible to send a mail with an individual content primarily to me and ideally also to the user whenever a certain answer has been clicked in one of the 15 questions (and only in this case)?

Question 4:

Is it possible to rename the start button instead of "Quiz beginnen"? it would be better: "Analyse starten". If possible, how to do that?

=====

Hello,

1. It is possible to show different templates based on number of earned score for trivia quizzes. Different content can be shown depends on main personality for personality tests. It is also possible to show top N personalities with earned score for them. Does it what you need? Or do you need more complex solution?

2. Currently emails are sent only to quiz takers. We are going to add ability send it to administrators.

3. The plugin doesn't support this ability.

4. Sure, it is possible. All labels/messages are located in .po/.pot files. You can read here how to modify existing translation or create a new one.

Regards,
ARI Soft

Hello

You said in your response here to question 1 that It is also possible to show top N personalities with earned score for them.

how to do this please as I have been looking for ages?!

Hy iplaut,

choose "Quiz"

choose "Personalities"

enable ""show several personalities on final page"

Count: ____ (Here yo can choose how many of personalities should be shown additional to the main personality (for example a second or a third one)

enable "show content only for main personality" (if the descriptions of the second or third Personality should not be shown in detail)

I hope this will help!

Thanks for your response.

Yes showing the different personalities is not an issue.

It is showing the score for the different personalities - how to do this please?

Go to "Settings"

Go to the "Share" tab

Scroll down until to the section:

"This parameters section is used to configure sharing content for personality quizzes".

Write in the top line:

You show {{userScorePercent}} Percent the behavioral property {{title}}, in total you have selected {{score}} out of {{maxScore}} Questions selected with this property.

thanks for your help.

Is it possible to see these results of the score per personality on the backend?

Or is it possible to email to admin these results of the score per personality?

Please advise

=====

It's a pity that you as an admin have no chance to recall these evaluations of the results page in the backend afterwards
It would be nice if you also receive an email with the results (in cc, so to speak).

But both seems to be (currently) not possible, although some have already asked for it here in the forum.
