Creating new language override file. How to name
Posted by forexima - 2023/03/01 20:22

_____

I have created a new language file, using the template in the override folder. This is to change the 'Start Quiz' button to 'Start Assessment'

What is the exact format of how the file should be named, using en_US in it?

Thank you.

_____

Hello,

It depends on what language is active on your site. If it is English it can be also en_GB (for English (UK)).

Regards,
ARI Soft

_____

Yes, I know it can be any language, which is why I stated that I am using en_US.

I asked what is the FORMAT for naming the new file.

I would appreciate an answer that relates to my actual question.

Thank you.

_____

We don't use any custom formats for naming language files. It is WordPress standard so use ari-stream-quiz-en_US file name with .po/.mo file extension.

_____

That's what I needed.

Many thanks
