## Change the design of the results

Posted by TDLL2022 - 2023/03/17 11:41

---

Hey,

my quiz is nearly finished now. I just have one last design-question. ...and unfortunately I am not able to solve it by myself:

Which CSS do I need to change the font-design of the results of the answers?

I'd like to change the font-size from 16 to 14 and also the line-height from 1.5 to 1.0

Would be really glad, if someone could help me with that - thanks! :)

Best regards,

Linda

Hello,

Open "ARI Stream Quiz -> Settings -> Advanced" page and populate "Custom CSS styles" parameter with the following code:

```
.asq-theme .quiz-result * {  
    font-size: 14px !important;  
    line-height: 1 !important;  
}
```

Regards,

ARI Soft

I tried to enter this code that you provided to the other customer into the Custom CSS Styles section under Ari Stream Quiz / Settings but nothing looks different on the front end. I assume this code is not responsive code but would be great if it was.

I'm really trying to adjust the font size of both the Question and Answers for the Personality Quiz. Is this the only code that needs to be inserted or is there other JS Code that needs to also be added. I also use the Snippets Code plugin so if there is any additional code I need to add there please let me know.

I also want to be able to change the columns. When I use the shortcode in the Elementor page I created: , is this not supposed to create two columns?

Great plugin by the way

Hello,

Could you provide a link to a page quiz with a quiz? It helps to avoid conflicts with 3rd party styles.

---

About "col" parameter of "streamquiz" shortcode, it is used to specify how many column will contain questions with image-based answers.

Hi there, here is one of the quiz pages. Nothing I have tried enables me to adjust the styling of the quiz and its layout. It is embedded as a shortcode in a page built with Elementor:  
<https://chinesemedicineclinic.com/online-assessment-of-immune-health/>

Hello,

We can't open the link:

<https://www.ari-soft.com/images/fbfiles/images/block.jpg>

We opened the site via VPN, but the page is not available. It redirect to 404 error page. Is it available for guest users?

Add the following CSS rule (you can use "ARI Stream Quiz -> Settings -> Advanced -> Custom CSS styles" parameter) to decrease font size for all quiz elements:

```
body .asq-theme * {font-size: 14px;}
```

"col" parameter in shortcode are used only for image-based answer. Your quiz contains only plain text answers so it doesn't work.
