## Same personality, multiple answers

Posted by strategicdeals - 2023/05/22 00:49

Sorry, I posted the same question on the Joomla forum by mistake. I couldn't figure out how to delete the question there...

I'm working on a personality quiz for a client and he wants to have more than one personality type associated with the same answer. Is this possible?

This is what I mean: for example, question 1 asks if participant likes certain colors. Answer A says 'red'. 'Red' matches personalities 1 and 2.

As far as I understand the plugin I can't match an answer to more than one "personality type". Is this correct?

Hello,

It is possible to assign score for different personalities per each answer so for example you can set 1 point for "personality 1" and also 1 point for "personality 2" if user selects "Red" answer.
