## Integration with Unisender

Posted by Giorgos93 - 2023/08/07 10:01

---

Hi! I bought Pro-version of your plugin because of integration with Mailerlite. However, Mailerlite restricted it's access to people from Russia, because of sanctions.

I didn't want to change the service because of this integration. But 1.5 years passed, so I have no other choice. So I switched to Unisender service. However, you don't have an integration with Unisender.

So, is it possible to make the integration? It's probably the most popular email-service in Russia atm. Here is their API documentation - <https://www.unisender.com/ru/support/category/api/> . It's in Russian, but I can help you with any questions about translation.

Can you do this, please?

Hello,

We will investigate ability how to add builin-in Unisender support. Currently you can use Zapier or Make.com services ("ARI Stream Quiz" v. 1.8.0 supports integration with Make.com) for Unisender integration.

Regards,  
ARI Soft

Thanks, I hope, that you'll be able to add a build-in integration, because the email-service is popular!
