
Correct answers not showing

Posted by goteborgnu - 2024/02/07 14:04

When the quiz is finished I expect the correct answers to be shown. The result template i shown, but the only the given answers are shown, not the correct alternatives.

See image - correct answers are all except Alien. (Q: which monsters have gone berserk in NY?)

I really can't find a way to fix this... help please.

Hello,

See "Contains parameters for configuration trivia quizzes -> Show result per question" parameter on "ARI Stream Quiz - > Settings -> General" page. Set it to "Immediately after user answer" or ""When quiz is completed".

Regards,
ARI Soft
