_____

How to do it, when clicking on the show results button, the page automatically returned to the first question.

_____

If you want to scroll to the first question instead of keep scroll on results then open "ARI Stream Quiz -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
jQuery(document).on('stream_quiz:show_results', function(ev, data) {
  var quiz = data.quiz;
  setTimeout(function() {
    quiz.el.find('.quiz-question').eq(0).get(0).scrollIntoView();
  }, 10);
});
```

Regards,
ARI Soft
