New quiz question starts at the beginning of the p
Posted by taryaniksergey - 2024/04/25 11:05

_____

Good afternoon
Can you help me with the code, please:
so that each new quiz question starts at the beginning of the page. My question doesn't start at the beginning of the page - it skips the execution slider and the title of the question.

_____

Hello,

Try to add the following value to "Scroll offer" parameter on "ARI Stream Quiz -> Settings -> General" page:

#masthead

Regards,
ARI Soft

_____

Sorry, the correct name is "Scroll offset":

_____

This option makes sense when "Smart scroll" is enabled (on the same settings page). Otherwise the plugin doesn't affect on scroll position.

Regards,
ARI Soft
