
Multiple Personality Results to Zapier

Posted by 3ami - 2024/08/02 10:44

Hi,

We have a 'personality test' where each question can have multiple answers. Based on these answers, the respondent gets points, which then determine their personality type.

It can happen that personality 1 and personality 2 receive the same number of points. Ideally, I would like to see both personalities sent to Zapier (separated by a comma or something similar). Is this possible?

Thanks in advance for your help.

Hello,

Currently the plugin sends only main functionality, but it supports `asq_zapier_data` hook filter. It can be used to extend data which is sent to Zapier.

We can create a plugin which will do it.

Thnx. I will dive into de hook.

What will it cost if you make an extra plugin/functions.php code for this?

That would be fantastic. We would prefer to get the personalities in Zapier ordered by points and/or separated with the points included. Just like it can be shown directly on the site as a result: 'Show several personalities on final page'.

Hello,

"ARI Stream Quiz Zapier Multi Personalities" plugin is available here. Install it via "Plugins -> Add New Plugin -> Upload Plugin" page. Don't forget to enable it after the installation.

The plugin sends several personalities with score (it is based on quiz configuration) separated by comma to Zapier.

Great! We can work with that. Thanks for your help.

Do you also have an invoice for the plugin/license itself that we can use for our administration? Or do I need to request it separately? I've already checked the account, but I can't find it anywhere.

The plugin can be installed on any number of sites for "Developer" license.

Sorry for the misunderstanding. I was referring to the invoice for our order for our administration/taxes.
