\"Run Adminer in Modal Window\" not working

Posted by elvalen1987 - 2023/08/09 08:33

_____

I am trying to upload something into my database. When I go to "Ari Adminer", connection "Wordpress Database" and I click "Run Adminer in Modal Window", I get a blank window (see attached).

This has never happened to me beforehand I have been using the plugin for years. Please advice on how to fix this.

Many thanks.

_____

Hello,

Could you specify what plugin, WordPress and PHP versions are used on your site?

Regards,
ARI Soft

_____

Hello,

The plugin is called" ARI Adminer" Version 1.2.3 | By ARI Soft

My Wordpress version is: 6.3

My PHP version is: "8.1.18" PHP version

Thank you for your help.

_____

Helloâ€"

I am following up on the message I previously sent.

This is affecting my website performance so if I can please get a response as soon as possible. Many thanks.

_____

It seems this is a problem with PHP 8.x compatibility. We will try to update Adminer to latest version, but it will take a time.

Regards,
ARI Soft

_____

Okay, thank you for your response.

When you say "it will take some time", are we talking about days, weeks, or months? I need to know to make a decision whether I keep the plugin or not.

In addition, is it possible for me to hire a developer to work on this so I can get it fixed?

_____

"ARI Adminer" v. 1.3.0 is available here. Unzip it and upload new version instead of old one to your server (by FTP or via file manager in hosting panel).

Regards,
ARI Soft
