# Idea how to improve the plugin

Posted by igormyskiv - 2017/07/02 15:17

_____

I like the ARI Fancy Lightbox Pro plugin, but I have any idea how to improve the plugin. I'll illustrate everything with screenshots.
Detailedly - in the PDF, which I sent to you in the attachment to the message to your email address info@ari-soft.com.

_____

Hello,

Thank you for your suggestion. We will improve sharing functionality in the next major version of the plugin.

Regards,
ARI Soft

Hello!

In the summer I asked you to fix gross errors of the plugin. You promised to do this in the next major release, but you have not done that.
23-01-2018 I updated the plugin to the next major release - version 1.7.1 - and saw that one of the major plugin errors was not fixed yet.

Fix the bug  please!!!

(See attached screenshot) http://www.ari-soft.com/images/fbfiles/images/2018_01_23_204119.jpg

Hello,

Sorry for this delay. We postponed implementation of this feature due to hard working on other updates and some tech problems. We will update it in v. 1.8.0. It is in development now and it will be the main feature of this release.

Regards,
ARI Soft

OK, I'm waiting for this new major update.

In addition, I want to remind you of another bug I wrote also about in the summer, but it is still not corrected (see attached screenshot). Please also correct this bug in version 1.8 of the plugin http://www.ari-soft.com/images/fbfiles/images/2017_08_18_131357.jpg

_____

The problem with Facebook locale was fixed in v. 1.6.3
