
navigation buttons not showing

Posted by JoQe - 2017/08/05 14:24

Hi there,

I installed Ari Fancy Lightbox with BeTheme. I made a mobile version of the gallery using the plugin. I had to disable the default lightbox of the theme. However, the navigation arrows are not showing. I think AFL inherited some CSS features of my theme (buttons are automatically using the blue overlay I use everywhere else), and this is probably what is causing troubles.

Is there a way for you to examine this quickly ?
The website isn't online yet, let me know if I can send you a link to it.

All the best,
Jo

Hello,

Could you send a link to a page by email where the lightbox is used. It seems you use it with custom image gallery.

Regards,
ARI Soft
