
Wordpress Lightbox with .mp4 video

Posted by ochiengj - 2017/08/09 03:25

I am not able to make it work with .mp4 videos. I cannot use youtube as the client does not want anything to do with youtube so we have the videos as mp4 on the host. Any help please. Thanks.

Hello,

The following HTML code can be used to open mp4 videos into the lightbox:

MP4 video

Thank you it works finally! But this allows the mp4 to be downloaded from the video controls that appear below video. How do I disable download? or hide the video controls? Also is there a way to increase the buffer for the mp4?

Sorry I'm new to this plugin!

The following code can be used to hide all controls:

MP4 video
