
Lightbox Not Opening on Galleries

Posted by LushCreative - 2017/10/04 19:22

Hi,

I have a theme installed that already has a lightbox included, but added ARI Fancy Lightbox because it has better functionality. I was having the issue that the theme's lightbox was opening below the ARI lightbox on individual images. I've reached out to the theme developer to find out how to disable their lightbox to take care of that issue. But I still can't seem to add the ARI lightbox to galleries. I have "Convert Wordpress Galleries" checked, but it still only works on individually added photos, galleries are still opening up the image link. Example:

<http://www.starbucks melody.com/2017/09/11/nicknamed-stealth-starbucks-15th-avenue-coffee-tea-closes-permanently>

Any help would be appreciated!

Thanks,
Shauna

Hello,

Open "Advanced" tab on "ARI Fancy Lightbox -> Settings" page and populate "Custom JS code" parameter with the following value:

```
setTimeout(function() {$('.post-content-gallery-item A').off('click.lightcase');}, 300);
```

It disable original lightbox. After this open "Integration" tab and populate "Images -> Custom grouping selectors" with the following value to enable navigation between images:

```
.justified-gallery$$A
```

Regards,
ARI Soft

This has not worked - now it is displaying a 'screen show' of my website behind the image and not just the image

This solution was for LushCreative case to resolve the problem with another lightbox which is used for galleries on the site. This may not work in your case.

Could you provide a link to a page where the problem occurs so we can investigate it?

Regards,
ARI Soft
