external link

Posted by Bobbtwtm - 2017/10/24 16:14

_____

Could you please help me open external links in lightbox.

I AM A COMPLETE, TOTAL, ABSOLUTE BEGINNER. I won't understand anything except the simplest concrete steps. Really.

On this page, http://bringtheworldtome.com/animal-camouflage/ there are three links to open in lightboxes.

I do have the plugin installed, do have the Integration > convert links box ticked. I tried with and without advanced > remove 3rd party plugins

Of the three links on this page (links to external pages--not any videos):

First one fails to open

Second one takes a really really long time but does open in lightbox

Third one fails to open

I hope you can help me. Remember, I'm and absolute beginner with absolutely no knowledge.

Thanks!!!!

_____

Hello,

The 1st and the 3rd links can't be opened into a lightbox because the sites contain protection from loading into element.

Regards,
ARI Soft
