
Setup notifications for FB comments

Posted by xega - 2017/11/20 14:39

Hi

Do you have a guide for how to get notifications when a comment is made in the lightbox? I have the PRO version of the plugin (purchased yesterday).

I found this guide: <https://developers.facebook.com/docs/plugins/comments/#moderation-setup-instructions> but I'm stuck on point 6.

Thanks in advance!

xega

Hello,

According to tutorial, it requires custom coding. Sorry, but the plugin doesn't support this functionality (notification about comments) out of box. We will investigate ability to implement it in a future version of the plugin.

Regards,
ARI Soft

This one:

<https://developers.facebook.com/docs/plugins/comments/#moderation-setup-instructions>

It requires to register a Webhook.

Ah ok, yes I was stuck on that point. I hope that will be available in a future update. This is an excellent plugin!
