
No lightbox when sharing an image

Posted by xega - 2017/11/23 03:37

Hi

I have a gallery here: <https://www.hafdal.dk/legstadaleit/index.php/2017/11/22/prestathjonustubok-grenjadarstadar-1941-1967>

When I click on an image it opens in a lightbox as it should. If I then click on any of the share buttons, like f.ex. Facebook, the image that is linked to in the share is not in a lightbox. Is it possible to fix that? I need my users to be able to see all the comments that have been made to an image, as well as the image info.

Thanks in advance
Rakel

Hello,

Could you provide a screenshot to illustrate the problem?

If you do as follows:

1. Click on this link: <https://www.hafdal.dk/legstadaleit/index.php/2017/11/22/prestathjonustubok-grenjadarstadar-1941-1967>
2. Click on any image
3. You can see that this image opens in a lightbox with the comment box open and sharing options available on the left.
4. Now click on any of the sharing options, f.eks. Facebook - and share the image to your Facebook.
5. Go to Facebook and click on the link that you just shared.
6. The image opens, but NOT in a lightbox.

Is it possible to fix that?
