## Does it work with Master Slider?

Posted by jbercianos - 2017/12/09 17:18

---

Hi guys,

Great WP plugin. Quick question, I am using Master Slider for the creation of complex slides and would love to use your lightbox to present the resulting slides. Could you let me know if this works / how it would work?

Thanks!

Jorge

Here is a link to Master Slider documentation regarding lightbox usage. They refer to a 'rel attribute' option that needs to be completed based on the selected lightbox.

<http://docs.averta.net/display/mswpdoc/Using+Lightbox+in+Master+Slider>

Hello,

Try to populate "CSS class name" parameter on "Misc" tab with the following value:

ari-fancybox
