
Multiple lightboxes if opening an image

Posted by josefbuergi - 2018/01/08 09:48

Hi

Iâ€™am using the Fancy Lightbos Plugin since a few days. I m struggling with a lightbox issue.

If I click on an image in the gallery the â€œnewâ€• lightbox opens correctly. But when I close it then a second lightboox appears â€œunderâ€• the first one.

How can I get rid of this? Many thanks.

Joe

Hello,

The second lightbox is added by your theme. Open "Advanced" tab on "ARI Fancy Lightbox -> Settings" page and populate "Custom JS code" parameter with the following code to disable the second lightbox:

```
setTimeout(function() { $(' .gallery').off('click'); }, 10);
```

Regards,
ARI Soft
