Font Type & Size

Posted by jimfrost - 2018/01/18 17:28

_____

Is there anyway to change the font style and size used in the Lightbox title please?

Thanks in advance.

Hello,

Open "Style" tab on "ARI Fancy Lightbox -> Settings" page and populate "Custom CSS" parameter with the following value:

.ari-fancy-title {font-family:Tahoma;font-size:20px;}

Regards,
ARI Soft

_____

I've just noticed that when I click on an image in the lighbox the "default" font still loads. When I close the lighbox and then re-open the same picture the chosen font (as per the CSS above) is displayed correctly in the lighbox. Is there a fix for this? Thanks in advance again!

_____

Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

Here you go:

https://www.jimfrost.pictures/project/the-cairngorms-winter/

The pictures are in "Essential Grid" so I'm just using the "Convert Links to Images" option and turning off the EG's own lightbox.

Thanks again.

We can't reproduce the problem. The title is shown normally on our side:

 http://www.ari-soft.com/images/fbfiles/images/fb_lightbox.jpg

Could you specify the browser which you use? Does the problem occur immediately when click by an image in the gallery?

Regards,
ARI Soft

Thanks again for the reply. I have tried Chrome and Safari iOS with the same result - when I intially click on the image the title is in the "default" format but when I close the image and then re-open it the font selected in the CSS is seen. As an aside I have also tried IE11 and don't see the title at all!

If you can't replicate the problem then it may well be an issue my side. I'm away from home at the moment on not the best connection!
