
Navigate between gallery images

Posted by Alexandros_T - 2018/01/20 18:42

Hello. I like this plugin and thinking of purchasing the pro version. My problem is that I use "Fast gallery for visual composer" as my gallery plugin. The lightbox works but without the "Navigate between attachments" function. Can you help with this, tried to add a class without result.
<http://tripinpictures.com/galleries/egypt-gallery/>

Another question is if Facebook sharing in pro version, shares the particular image, not the whole post.

Regards

Alex

Hello,

Open "Integration" tab on "ARI Fancy Lightbox -> Settings" page and populate "Custom grouping selectors" parameter with the following value:

.gallery\$\$A

Try to add the following value to "Custom grouping selectors" parameter:

.photomosaic-container\$\$A

Unfortunately i had already tried that without result. I have it now in 2 lines.

.gallery\$\$A
.photomosaic-container\$\$A

You can see it's still not working

It doesn't work because Photomosaic builds gallery dynamically via javascript on client side. Try to add the following code to "Custom JS code" parameter on "Advanced" tab from "ARI Fancy Lightbox -> Settings" page:

```
$(window).on('load', function() { $(''.photomosaic-container A').attr('data-fancybox', 'pm-gallery'); });
```

This looks like a perfect plugin for me, but I can't get navigation to work with my photomosaic gallery at all. I have tried the suggestions in this thread but without success. The fancybox lightbox appears, and I have zoom function, but not navigation. Any further suggestions would be greatly appreciated.

Thank you.

Re:Navigate between gallery images

Posted by admin - 2018/09/17 19:03

Hello,

The problem occurs because photomosaic builds gallery dynamically and we need an event/callback which is triggered by photomosaic to attach lightbox navigation. We can't find any public API for this plugin. If it supports this event/callback, we will help to configure navigation.

Hello , please , provide "Custom grouping selectors" parameter for Justified Image Grid gallery.

Test-example links : <http://classphoto.ru/2018-year/>

Thanks for any tips

Just bought pro version. Works fine :laugh:

Hello , please , help me to get right code for "Custom grouping selector" for Photonic Google Photos gallery.

The sample page is here : <http://classphoto.ru/photonic-galleries/>

The lightbox works fine, but I can not to get navigation between images.

Thank you

Re:Navigate between gallery images

Posted by admin - 2018/09/25 19:11

Hello,

Use the following selector:

.photonic-stream\$\$A

Regards,
ARI Soft

Re:Navigate between gallery images

Posted by denye - 2018/09/25 21:14

.photonic-stream\$\$A - it works for Flickr. For Google - nope.

Any Ideas more , please

I`ll tried a lot of other keys

.photonic-google-stream\$\$A + other

No lucky
