
Image count overlapping with social media buttons

Posted by Karav - 2018/01/27 15:23

On current version 1.71

The image count in galleries is overlapping with the social media buttons.

See screenshot.

On previous versions the image count was centered on the screen and directly above the picture.

Version 1.7.1:

Sorry for this. We will fix it in the next version of the plugin. Currently you can add the following CSS rule to "Custom CSS" on "Style" tab from "ARI Fancy Lightbox -> Settings" page:

```
.fancybox-show-toolbar .ari-fancybox-share-buttons {  
    padding-top: 44px;  
}
```

Thanks, this works well on the usual desktop screens.

On devices with smaller viewports, the social media buttons are a bit "jumpy".

Like this (no big deal, just to let you know):

The plugin shows it in this way to avoid overlapping with navigation arrow.
