## Smart Slider 3 Integration

Posted by shapsp - 2018/02/17 12:08

---

Hi,

I am using Smart Slider 3.

It is good but the fullscreen mode & lightbox mode is not as good as yours.

Is there anyway I can use your plugin to replace the lightbox of Smart Slider 3?

I am willing to even pay for your technical support if required.

Thank You,  
Sha

Hello,

Could you provide a link to a sample slider where you want to replace original lightbox with "ARI Fancy Lightbox"?

Hi,

my site,  
<http://propertylead.com/kingsford-waterbay/>

the slider that I am using,  
<https://smartslider3.com/>

default slider lightbox,  
<https://smartslider3.com/lightbox-slider/>

Just a hint, it was one of the most popular and best sliders. but, their lightbox is very bad and your lightbox is great. if you can hook them up, it will be a big plus.

I am hoping it can be done. and willing to pay for it too.

Regards  
Sha

Hello,

Try the following solution:

Open "Advanced" tab on "ARI Fancy Lightbox -> Settings" page and populate "Custom JS code" parameter with the

---

following code:

```
setTimeout(function() {  
    if (!jQuery) return;  
  
    jQuery.ready(function($j) {  
        var elements = $j("");  
        elements.off('click').off('n2click').addClass('ari-fancybox');  
        elements.each(function() {  
            var $this = $j(this);  
            $this.attr('data-src', $this.attr('data-href'));  
        });  
    });  
}, 10);
```

We guess it will work with "ARI Fancy Lightbox PRO".
