## Missing fb:app\_id

Posted by Alexandros\_T - 2018/02/28 14:25

---

Hello. I keep getting a message of "The following required properties are missing: fb:app\_id" in Facebook Debugger. I think i have correctly added my app id in the plugin. Deep linking and fb comments work correctly but as I mentioned in a previous request, when sharing, the image thumbnail gets wrongly the page's featured image, not the image previewed in lightbox.

Can you please fix?
