
Scrolling in Lightbox

Posted by user_123 - 2018/03/07 14:01

Hello

I am currently working on a website. I am using ARI Fancy Lightbox and it works great. But there is one problem. When an image is open in Lightbox, I want the scroll wheel on the mouse to zoom in on the image, but instead it switches between the images.

Is there a way to change this?

Thanks in advance for your help.

Hello,

Currently it is not possible. It requires to create a custom javascript plugin for the lightbox or modify lightbox javascript code.

Regards,
ARI Soft
