## After one hour I have no clue - Lost of time

Posted by mariolopes - 2018/03/14 12:06

---

I'm not very smart I know. After one hour I can't understand how this Fancy Lightbox works. Lot's of documents on website, lot's of text but no one tells me how this stuff works.

I simply want to popup the image on <http://apecsp.com/index.php/2018/03/14/teste/>

but no clue. I installed the plugin and now what I have to do? Thank you for wasyting my time with this.

The good news is that your plugin is easy to uninstall and that I can do without your help.

Hello,

The plugin attaches lightbox automatically (depends on configuration) to image galleries, post images, PDF and video links, etc. The page which you provided contains only the image without link to original (large) image so the lightbox is not attached to it. It seems when you added the image to the post via "Add Media" button, you set "ATTACHMENT DISPLAY SETTINGS -> Link To" parameter to "None", change it to "Media file" and the lightbox will be attached if "ARI Fancy Lightbox" plugin is enabled and "Integration -> Images -> Convert links to images" parameter is enabled on "ARI Fancy Lightbox" page.

Works fine.  
Thank you
