## how can i change the width and height of fancybox

Posted by momo7f - 2018/12/05 09:29

---

Hello,

how can i change the width and height of `<div class="fancybox-content">`  
( ARI Fancy Lightbox 1.8.0 )

Hello,

What content do you show into the lightbox?

content :  
YouTube Video

width: 100%,  
max-width: 1280px;

It is possible to set width/height for the particular video. For this add data-width and data-height attributes to `<video>` tag. It will look like:

Video tutorial

Thanks for help, but the old subjects must be modified.

is there a way to do it using javascript or css?

---

Populate "Custom JS code" parameter on "ARI Fancy Lightbox -> Settings -> Advanced" page with the following code:

```
$(document).on('ari-fb-after-init', function() {  
    $().each(function() {  
        $(this).attr('data-width', 600).attr('data-height', 200);  
    });  
});
```
