
Wordpress 5 and ARI Fancy Lightbox doesnt work

Posted by pimmus - 2018/12/08 07:34

Hello. I am new here and i have a question.

This morning i updated my website to WP 5. After that i want to ad a new foto update to my website. When i import new pictures to the foto gallary, the result online are not the same as i had before the WP 5 update. My older items who i created before WP5 are still ok.

I think the fancy lightbox plugin is not connected with the page where you can create a new page.

Can anny body help me with this issue?

Thanks already

Hello,

If you have a problem with navigating between images in Gutenberg gallery, try the solution from this post. It is currently used in PRO version and we will add it to free edition in the next release.

Regards,
ARI Soft
