disable all button on right corner

Posted by terencewp - 2019/01/05 07:44

―――――――――――――――――――――

HI,

It works perfectly to read pdf doc in light box but I need to disable the button "rotate", "download" and "print" button.

Could you advise how it can be done?

Thanks http://www.ari-soft.com/images/fbfiles/images/disable_all_button.jpg

―――――――――――――――――――――

Hello,

It is not possible because you use native PDF viewer. It is loaded via browser's plugin and doesn't provide any API to hide the buttons.

If you show local PDF files which are hosted on your site then PDFJS viewer can be used. See "ARI Fancy Lightbox -> Settings -> Integration -> PDF Files -> Local PDF viewer" parameter. Add the following code to "Advanced -> Custom JS code" parameter to hide the buttons:

```
$(document).on('afterLoad.fb', function(e, instance, current, firstRun) {
  if (current.contentType === 'pdf') {
    current.$iframe.off('load.pdf').on('load.pdf', function() {
      current.$iframe.contents().find('.toolbarButton.print, .toolbarButton.download, .secondaryToolbarButton.rotateCw,
.secondaryToolbarButton.rotateCcw').hide();
    });
  }
});
```

Regards,
ARI Soft

Thanks and I now switched to "pdfjs" but I found other buttons there too.
Could you help and advise how I can disabled them all...thx!

―――――――――――――――――――――

If you want to hide toolbar, populate "Advanced -> Custom JS code" parameter with the following code:

```
$(document).on('afterLoad.fb', function(e, instance, current, firstRun) {
  if (current.contentType === 'pdf') {
    current.$iframe.off('load.pdf').on('load.pdf', function() {
      var doc = current.$iframe.contents();
      doc.find('.toolbar').hide();
```

```
      doc.find('#viewerContainer').css('top', 0);
    });
  }
});
```

Hi,

I put your sript on "Advanced", "custom css script" but still can't disable the buttons, do you know how I can disable them..thx!

_____

The provided code is for PRO version. For free version use the following one:

```
jQuery(document).on('afterLoad.fb', function(e, instance, current, firstRun) {
  if (current.contentType === 'pdf' || current.type === 'iframe') {
    var $iframe = current.$content.find('iframe');
    $iframe.off('load.pdf').on('load.pdf', function() {
      var doc = $iframe.contents();
      doc.find('.toolbar').hide();
      doc.find('#viewerContainer').css('top', 0);
    });
  }
});
```

_____

Use the following code to hide only right toolbar buttons:

```
jQuery(document).on('afterLoad.fb', function(e, instance, current, firstRun) {
  if (current.contentType === 'pdf' || current.type === 'iframe') {
    var $iframe = current.$content.find('iframe');
    $iframe.off('load.pdf').on('load.pdf', function() {
      var doc = $iframe.contents();
      doc.find('#toolbarViewerRight').hide();
    });
  }
});
```

_____

Thanks and it works perfectly.

Just wondering if I can use "Custom CSS" to define lightbox size and other display attribute?

Thanks

Re:disable all button on right corner

Posted by admin - 2019/01/22 06:30

_____

data-width and data-height attributes can be used on link which triggers the lightbox to define width/height. For example:

PDF

The lightbox will save aspect ratio based on defined width/height.

Hi,

Could you advise if there is way I can change size and place of the "x" closing lightbox indication as it is currently position on the top right corner which is hard to be reached by a tall portrait display....thx!

_____

Is there any way to actually get rid of the the right sided toolbar, so that it is not only hidden, but cannot be easily brought back? With the hidden element, all I need to do is to open up the source code and change it to visibility:normal.

==

Re:disable all button on right corner
Posted by admin - 2021/01/31 09:28

_____

Add the following code to "ARI Fancy Lightbox -> Settings -> Advanced -> Custom CSS" parameter:

.fancybox-toolbar {display: none !important;}
