
Problems sharing images on twitter and linkedin

Posted by esteewhite - 2019/07/29 09:52

Hello,

I am trying to share a specific image from within the lightbox but the image is not showing up at all on twitter. It only shows a link.

On linkedin it is showing the featured image of the whole page where the gallery is located and not the specific image that I have selected to share.

This is the photo that I am trying to share - <https://esteewhite.com/travel-photography/gallery/united-kingdom-2016-2018/#!view/9194cd4c/trafalgar-square-london.jpg>

I have attached screenshots.

Please let me know how to correct this, thank you

I also noticed that once again there is an extra exclamation mark in my deeplink just between the # and the 'view'. I have deactivated all the other plugins I had but the exclamation mark stays there.

Hello,

We will extend support of Linkedin and Twitter to show correct thumbnail image in the next version of the plugin.

[#!view/9194cd4c/trafalgar-square-london.jpg](#) is a deeplink. It is configured on "ARI Fancy Lightbox -> Settings -> Advanced" page. See "Deeplinking" option.

Regards,
ARI Soft
