
Problems sharing images on twitter and linkedin

Posted by esteewhite - 2019/07/30 08:07

Hello,

I am trying to share a specific image from within the lightbox but the image is not showing up at all on twitter. It only shows a link.

On linkedin it is showing the featured image of the whole page where the gallery is located and not the specific image that I have selected to share.

This is the photo that I am trying to share - esteewhite.com/travel-photography/gallery/united-kingdom-2016-2018/#!view/9194cd4c/trafalgar-square-london.jpg

I have attached screenshots.

I also noticed that once again there is an extra exclamation mark in my deeplink just between the # and the 'view'. I have deactivated all the other plugins I had but the exclamation mark stays there.

Please let me know how to correct this, thank you http://www.ari-soft.com/images/fbfiles/files/Ari_forum_not_even_letting_me_add_an_image_so_there_you_go_a_text_file.doc
