
Is it possible to show CAPTION instead of TITLE?

Posted by saglix - 2019/08/02 12:52

I just purchased the plugin, did a good job! however there's one small thing I don't understand.
I want to show the image CAPTION text when the lightbox is open. Right now it shows just the TITLE. I didn't find any option to change that.
I've also tried to search a solution in this forum with no success..
Thanks in advance :P <http://www.ari-soft.com/images/fbfiles/images/snap.JPG>

Hello,

Could you provide a link to a page where image(s) which you want to integrate with the lightbox?

Regards,
ARI Soft

The plugin can show caption if it is defined in HTML code which is generated by a gallery plugin. On your site gallery plugin which you use doesn't add captions to HTML output so the lightbox can't show this information.

Could you be a little more specific? Which kind of HTML Code is the plugin using? I wonder if the MLA plugin is able to produce that code.

If your plugin adds caption as a HTML attribute to , tags, it can be shown in the lightbox.

Hello,
i have the same question: show CAPTION instead of TITLE

here's what my html looks like:

CAPTION TEST CAPTION.

how to lightbox show caption instead of title ?

Regards.

I apologize for the hasty post. After tapping some of settings on the plugin, without knowing how it started to show caption instead of title as I wanted.

As for the code, this is just adding of a image with caption in a simple post.

Your plugin is great, I chose it from at least 10 high rated plugins. And those that are very downloaded and popular do not stand in front of yours. With your plugin and a simple lazy load plugin I can make a better gallery :)

Thank you.
