# Add the social buttons of WhatsApp and Instagram
Posted by civilmac - 2019/08/07 20:12
_____

They would be so kind as to orient me in which way I can add the social buttons to share the images on WhatsApp and Instagram.

They should update the plugin and remove the social button from Linkeding and google + that no longer makes sense to have them in the plugin.

Thank you.

_____

Hello,

It requires modification of javascript code which is used by the plugin.

Regards,
ARI Soft

_____

I would like to add a request for instagram. I would love to have the ability for users to add their results to an instagram story with a link to the survey or quiz.

Another vote for being able to share on Instagram.
