## Comments on images.

---

Hello. Can you give me some guidance? What needs to be in place in order to provide comments on images using the ARI lightbox.

What I can get is to link the image to the attachment page. In this case the user doesn't see any lightbox effect with navigation.

Cheers

Hello,

The plugin doesn't support ability to show comments on images.

About attachment page, do you want to show navigation between all attachments on the page? If yes, open "ARI Fancy Lightbox -> Integration" page and enable "Images -> Navigate between attachments" option.

Regards,  
ARI Soft
