
HTML 5 Isses

Posted by jmargel - 2019/09/12 17:22

We use a flipbook that we publish to our website. Published in HTML 5 only it produces a index.html file. It runs fine in all browsers without the lightbox. With using the lightbox, chrome runs fine however in IE Edge the flipbook shows the pages vertically one after another. I attached screenshots for your review. If you want to see it live please let me know how I can send the credentials.

Chrome (working):

IE Edge:

<http://www.keystonebldg.com/Images/ie-2.jpg>

Any advice?

Hello,

Could you provide a link to a page where the problem occurs? You can send credentials by email.

Regards,
ARI Soft

Sorry for the delay. It doesn't look like a problem with "ARI Fancy Lightbox". The lightbox loads flipbook into element and doesn't affect on content. It looks like flip book doesn't work properly in . Contact FlipBook support so they check it.

Regards,
ARI Soft

The flipbook works fine in IE without your lightbox. They will tell me it's the issue with the lightbox. It works fine in chrome both with and without your lightbox.
