
Lightbox Not Working With Playlists

Posted by jdeszell - 2019/10/02 14:55

I have some playlists I'm trying to link to and it only brings up the first video in the list in the lightbox and doesn't move to the second video in the list.

I would have multiple links on a page I would like to pop up in the lightbox (sets of training videos).

I'm currently using the free version of the plugin but will gladly pay the money for the full version if that feature will work.

Is this possible with this plugin? I have been searching high and low to find a plugin that will actually do what I need.

Hello,

Could you provide a link to a page with the playlists?

Regards,
ARI Soft
