## Lightbox does not work on my website

Posted by FanyangMeng - 2019/10/20 12:31

---

Hi there,

After tried a lot of plug-in, Ari fancy light box fit my need most and I wanna use it on my blog. But after I installed it, it seems that it does not work with my theme.

Please have a look on the first picture of this page : <https://blog.fanyangmeng.com/python/opencv-sketchcxk/>

I have already install and active this plug-in, and turn on convert images, but it still does not work.

Please help me as soon as possible, I really need to make this plug-in work.

If you need any information please send me email

Hello,

Your theme contains custom CSS rule which brakes the lightbox. Remove the following CSS code from a theme CSS file:

```
.fancybox-inner div {  
    max-width: 100% !important;  
    height: auto !important;  
}
```

Regards,  
ARI Soft
