
Lightbox for External Link for One Domain Only

Posted by chrismortgagecoach - 2019/11/26 18:37

Hi,

So I see the JS Code for excluding certain external links from the lightbox:

```
var ignoreSites = ;
$('a').each(function() {
    var $a = $(this), domain = ARI_FANCYBOX_HELPER.getLinkPart($a.attr('href'));
    if (ignoreSites.indexOf(domain) !== -1) {
        $a.addClass('no-lightbox');
    }
});
```

BUT, for the most part, I only want to lightbox external links for ONE domain (but it's on multiple pages). Is there a code that does the opposite of the code above?

Hello,

Disable attaching the lightbox to external links in plugin settings and use the following JS code to attach the lightbox for specific domain:

```
var allowDomains = ;
$('a').each(function() {
    var $a = $(this), domain = ARI_FANCYBOX_HELPER.getLinkPart($a.attr('href'));
    if (allowDomains.indexOf(domain) !== -1) {
        $a.removeClass('no-lightbox').addClass('ari-fancybox-iframe');
    }
});
```

Regards,
ARI Soft
