How to remove right-hand scroll bar
Posted by vinner - 2019/12/02 14:40

_____

Hi,

I have installed the pro version and I'm now seeing the right-hand scroll bar visible while the lightbox is active, even in full-screen mode. Your demo page doesn't show the scroll bar. It never used to happen with the previous version.

Any ideas how I can remove the scroll bar?

Example: questel.co.uk/col-de-turini/

Thanks

Vinner

_____

Hi,

I managed to fix this with the following code in the Custom CSS box

body.fancybox-active {
    overflow: hidden;
}

This code was in the previous version. Hopefully it won't cause any other issues.

All seems to be working fine at the moment

Cheers

Vinner

_____

Hello,

This custom style should not affect on other functionality.

Regards,
ARI Soft
