## Image shows twice on lightbox

Posted by antoni2710 - 2020/02/21 21:34

---

Dear All,

I activated Lightbox on my webpage [www.stadtfuehrer-warschau.com](http://www.stadtfuehrer-warschau.com)

When I click on an image the image shows up, but below the image is shown a second time in smaller version with the title to the right of it.

Here an example: <https://stadtfuehrer-warschau.com/2018/02/09/krakowskie-przedmiescie-koenigstrakt>

Go to the first image in the post - it is Nikolaus Kopernikus.

I added the screenshot of it.

Do You have an advise what I did wrong?

I use the lightbox on another webpage and there it works fine.

Thank You for Your help

Best wishes Antoni <http://www.ari-soft.com/images/fbfiles/images/screen-e2635ae638e25dfbdd28309175b3f315.jpg>

Hello,

Open "ARI Fancy Lightbox -> Settings -> Advanced" page and populate "Custom JS code" parameter with the following code:

```
setTimeout(function() {  
    $("").each(function() { var $this = $(this), caption = $this.attr('data-caption') || ""; $this.attr('data-caption',  
caption.replace(/\>/g, ")); });  
});
```

Regards,  
ARI Soft

This is really great. It works. Perfectly.

Thank You a lot. This lightbox is really nice and I would miss it.

Thank You

Best wishes
